- ✓ You have windows that are drafty or may otherwise be inefficient
- ✓ You find it hard to regulate the temperature in the house
- ✓ You find that the floors in some rooms are too cold
- ✓ You suspect there may be hidden water leaks
- ✓ Your indoor air is too dry in winter
- ✓ Your heating/cooling system is not energy-inefficient
- ✓ You suspect that too much heat is being lost to the attic in winter
- ✓ You notice that sometimes there is moisture on windows or walls
- ✓ You have mold, mildew or musty odors present
- ✓ You’ve had ice-dams on the roof in winter

***Anyone else  
is just  
looking around***
